Summary

Full Stack AI Engineer focused on AI agents, desktop apps, DevOps, and AI-integrated web products. I build heavy-lifting applications that are fast, smart, scalable, and practical - from automated workflows, AI integrations, backend APIs, and desktop tools to modern UIs and production deployments. I handle the full stack so teams can focus on growth.

Technical Skills

Languages: Python, Rust, Go, TypeScript, JavaScript

AI & Agents: OpenAI, Gemini, LangChain, Ollama, n8n, Zapier, TensorFlow, Roboflow, ElevenLabs, Claude Code, Codex

Backend & Data: FastAPI, Supabase, PostgreSQL, MongoDB, ChromaDB, Backblaze B2, WebSocket, REST APIs

Frontend: React, Next.js, Tailwind CSS, Vite, Figma

Automation & Integrations: Twilio, Telegram Bot, Monday CRM, Stripe, Showcase IDX, email agents, calendar agents, voice/call agents

Desktop & DevOps: Tauri, Docker, AWS, GitHub Actions, Vercel, CI/CD

Tools: Git, GitHub, VS Code, Linux, Bun

Experience

VIYLSA Pakistan
Founder & CEO *2025 – Present*
- Founded and leading a 360° virtual tour creation company focused on immersive digital visits with AI-powered integrations.
- Managing product direction, client requirements, virtual tour workflows, web presence, and AI-enhanced customer experiences.

SecureIntent.AI Remote
Co-founder & Lead Systems Engineer *2026 – Present*
- Co-founded SecureIntent.AI and lead systems engineering, building a desktop security app that detects and blocks secrets, credentials, and sensitive data before they are pasted into AI tools.
- **Tech Stack:** Desktop App, Security, Secrets Detection, DLP, AI Tools.

Luxure.io Remote
AI Engineer *2026 – Present*
- Developing AI integrations for a luxury real estate platform, connecting Zapier, ElevenLabs, Monday CRM, email workflows, automated call receiving, calendar meeting bookings, and lead automation.
- Building practical agent workflows that connect users, leads, communication tools, and website actions into one streamlined experience.

Cloudon Remote
CTO *2026 – Present*
- Developing the product end-to-end, including the landing website, main application, full-stack features, backend logic, cloud storage workflows, and AI integrations.
- Working across UI, APIs, automation, deployment, AI file summaries, Telegram-first workflows, and product experience for a complete AI-powered storage platform.
- Helping with marketing strategies, product improvement, positioning, and growth-focused feature planning alongside technical leadership.

Ccript Agency Remote
Full Stack AI Engineer *2025 – 2026*
- Built full-stack AI features, automation workflows, backend APIs, and modern web interfaces for client-facing products.
- Worked with AI integrations, deployment workflows, debugging, and production-ready feature delivery.

Neuralogic Remote
AI Engineer *2025 – 2026*
- Developed AI workflows and LLM-based solutions for automation, data processing, and intelligent user experiences.
- Integrated AI models, APIs, and agent-style systems into real product workflows.

Ocryz Pvt Ltd Hybrid
AI Developer *2025*
- Worked on AI development tasks, prototype features, and applied automation for business and product use cases.

Education

National University of Technology (NUTECH) — Islamabad, Pakistan
Bachelor of Science in Artificial Intelligence – CGPA: 3.90/4.00 — *Aug 2023 – Present*

Army Public School Saddar — Peshawar, Pakistan
FSc (Computer Science) — *Aug 2021 – Jun 2023*

Frontier Corps Public School — Peshawar, Pakistan
Matriculation (Science) — *Aug 2019 – Jun 2021*

Projects

Cloudon.me | *AI File Assistant, Cloud Storage, Telegram, Web App* 2026
- Developed the website and main app for an AI-first cloud storage platform where users manage files, generate AI summaries, use Telegram-first workflows, and access cloud storage features through a clean web experience.

Luxure.io Website & AI Integrations | *Zapier, ElevenLabs, Monday CRM, AI Agents* 2026
- Built AI-powered integrations for a luxury real estate website, including lead automation, voice/call workflows, CRM updates, meeting booking flows, and website-connected agent actions.

DisasterConnect | *Tauri, React, TypeScript, Supabase, Leaflet* 2026
- Built a real-time desktop app for disaster management and emergency response coordination with incident tracking, resources, task boards, team messaging, alerts, SOS, reports, admin roles, and offline sync.

PinNotes | *Windows Desktop App, Tauri, React, TypeScript* 2026
- Created a lightweight desktop sticky-notes app with floating always-on-top notes, color selection, local-first usage, and no accounts or cloud dependency.

Gig Synappix | *FastAPI, React, AI Chatbot* 2025
- Built a full gig marketplace platform for hiring and getting hired with a FastAPI backend, React frontend, and AI chatbot experience.

Hill Icon (Skardu Hotel Website) | *Next.js, SEO, WhatsApp Integration* 2025
- Designed and developed the full website with custom branding, performance-focused UI, SEO, deployment, and WhatsApp booking flow.

NUTECH 360° Virtual Tour | *React, 360° Media, Deployment* 2025
- Delivered an immersive campus virtual tour platform with guided navigation features for events and visitors.

Scoutly (Automated Job Search Agent) | *n8n, LLMs, Email Automation* 2025
- Automates job discovery by analyzing a CV with AI, searching platforms, and emailing curated summaries with relevant roles.

OmniRecall (AI Knowledge Assistant) | *Rust, RAG, Multi-LLM Providers* 2025
- Built a privacy-first desktop assistant with global hotkeys, Spotlight-style UI, local RAG over PDFs/code, and multi-provider LLM support.

Nami (Real-time Chat) | *Rust, Realtime Messaging* 2026
- Developed a secure, lightweight real-time chat app with media sharing and presence/status features.

Cropwise (Crop Disease Classification) | *Python, CNNs, Flask* 2025
- Built a web app for crop disease prediction from leaf images using CNN-based classification, including training pipeline and UI.
